

□ FLEET XPRESS

Fleet Xpress delivers for evolving business. It brings together the best of Inmarsat's connectivity solutions - unrivalled flexibility to consolidate and scale IT requirements with a combination of satellite connectivity solutions - and takes place over a trusted endpoint security network.

Fleet Xpress is built to deliver control over your connectivity ecosystem. Making it easier to control spending, control data usage, control digitalisation strategy. Giving clear view of what connectivity means to your business today and tomorrow.

FLEET XPRESS

Fleet Xpress provides access to a wide portfolio of Inmarsat connectivity services through our Fleet Edge platform.

It leverages the world's most advanced satellite constellation, to link your connectivity ecosystem and deliver a best-in-class experience to crew.

TAKE CONTROL OF YOUR PATH THROUGH DIGITALISATION

As your business moves through its digitalisation journey, your connectivity solution should support and enable that. That includes the times when your business enters uncharted territory.

Modular Fleet Xpress allows you to easily upgrade bandwidth as you adopt applications at a pace that suits you, from email and basic office applications, to IoT-powered solutions and emerging technologies to enhance your data, insights and analysis.

FLEXIBILITY

Fleet Xpress is about choice and scalability. Made available in a range of packages, it is simple to see which packages align with your business and your objectives.

You can upgrade when it is right for you. Better yet, because Fleet Xpress is built on an incremental scale of changing configurations, it

is easier to fit upgrades into your digital strategy. Keeping you at the forefront of connectivity and supporting your business as it grows.

CONTROL YOUR SPEND

The flexibility of our packages means that you can respond quickly to the evolving needs of your business and crews, with top ups or upgrade options.

Spend on what you use, and nothing else - by selecting a package with speed and data that suits your needs today.

Once you've started, notifications keep you up to date with your data usage, so you can see when your data needs are changing.

CONTROL YOUR GROWTH

What happens if your data demand spikes? Simple, use one of our top ups. Top ups are a one-off purchase, that let you quickly and easily raise your data limit. So your operations and crew can go on uninterrupted.

With Fleet Xpress, you can monitor your usage. And if your requirements begin to change, your upgrade route is clear and predictable. Our incrementally designed packages mean you can foresee any change in your package price.

UPGRADE TO THE MOST COMPREHENSIVE MARITIME CONNECTIVITY SERVICE AVAILABLE

- First, fully-integrated, global digital platform from a single provider
- Always-on bandwidth
- Guaranteed global performance
- Dedicated pipeline for high-speed crew Wi-Fi
- Support your choice of next generation smart vessel applications
- Secure data transfer and cloud-based data management
- An incremental upgrade scale means you'll always have the right solution
- Our satellite roadmap sets the industry on course for a more efficient, higher performing and more sustainable future

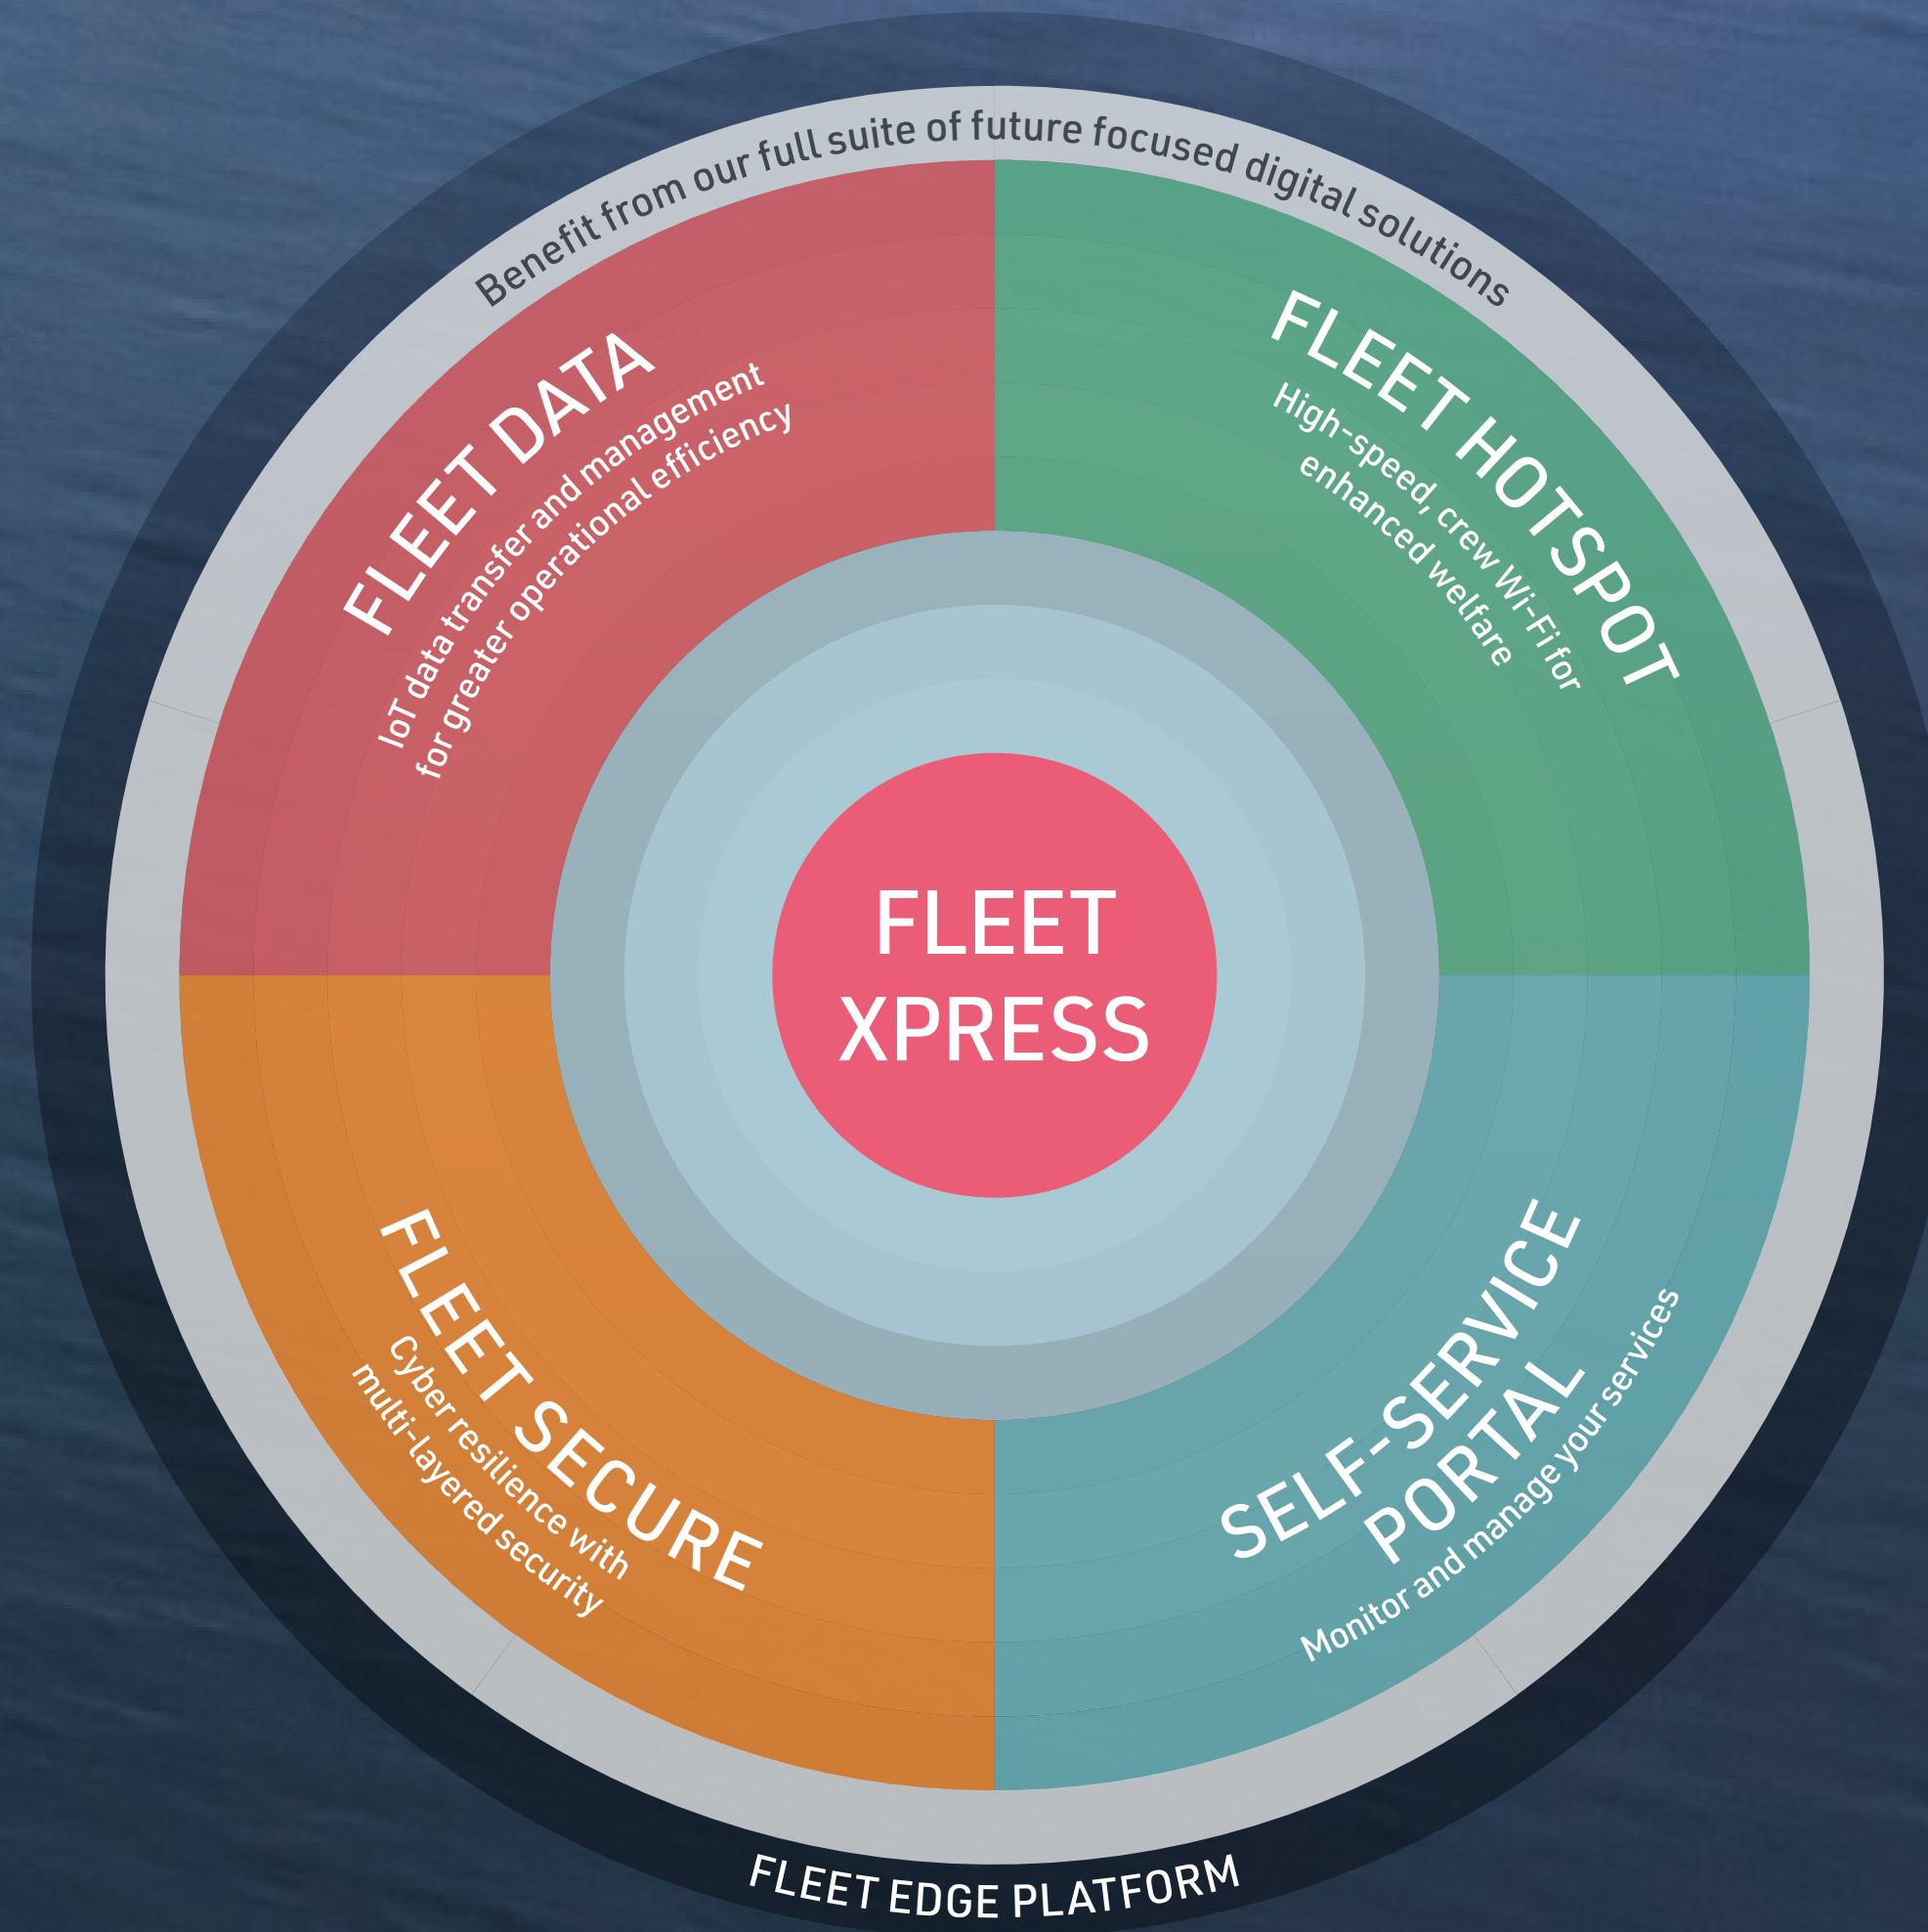

POWERED BY FLEET EDGE

- Unlocks the power of edge computing capability for always on communications
- Delivered via automated setup and configuration
- Enabling seamless delivery of new features, updates and bug fixes on the vessel with over the air software upgrades
- Fully secured highly resilient device
- Comes with a rich set of standardised assurance data through shore side APIs and edge interfaces
- Fleet Link dashboard provides crew with a clear view of internet connectivity status while at sea, as well as an easy-to-use troubleshooting wizard for Fleet Xpress.
- Integration with your vessel monitoring tools (via API)
- The future proof maritime edge platform designed to deliver Inmarsat Orchestra

INTEGRATED DIGITAL SERVICES AS A SINGLE MODULAR PLATFORM

Connectivity Operational Data Crew Wi-fi

- High speed
- Global coverage
- 99.9% availability
- Full redundancy
- Seamless integration
- Modular value-adds
- Single billing system

VALUE ADDS

Fleet Mail

Secure, stable, cloud-based mail for onboard office

Fleet Care

A fully managed repair, maintenance and support programme designed for Fleet Xpress customers

Bandwidth Management

Complete bandwidth management and optimisation

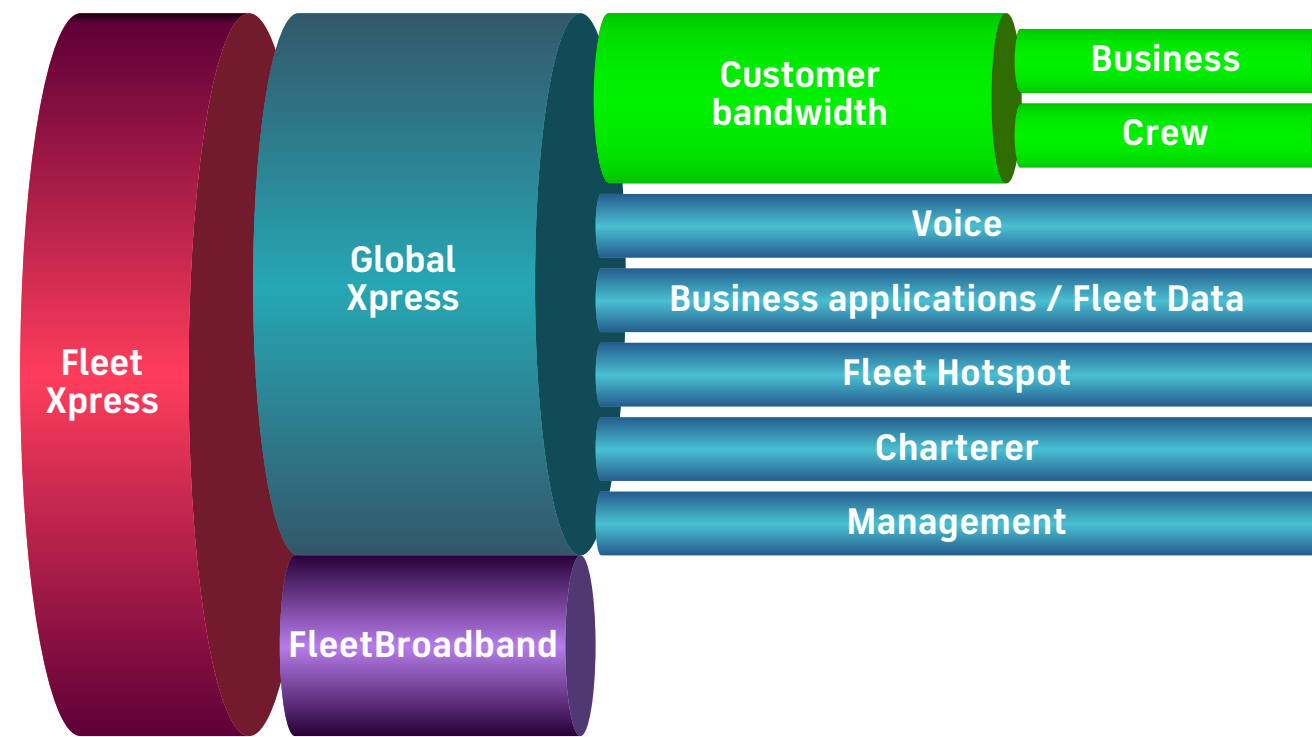

Dual Antenna Solutions

To reduce the impact of being in blockage

FLEET XPRESS

DEDICATED BANDWIDTH CHANNELS

Fleet Xpress delivers your connection in dedicated 'pipelines', to ensure a best-in-class experience.

The revolutionary bandwidth design of Fleet Xpress enables accurate bandwidth planning, management and support with separate pipes for 'Over The Top' (OTT) services.

- Customer bandwidth for business and crew
- Voice service is separate from customer bandwidth
- Site management and support for service assurance
- Separate bandwidth for third party business applications
- Unlimited FleetBroadband back-up

HOW TO BUY

maritime@inmarsat.com
inmarsat.com/fleet-xpress

UNDERPINNED BY A PROVEN CONNECTIVITY INFRASTRUCTURE, PURPOSE-BUILT FOR GLOBAL MOBILITY

Reliable & Resilient

- Fully owned and operated global networks, with in orbit and terrestrial redundancy
- Always on - with automated switch over to FleetBroadband as integrated backup
- 99.9% Ka/L-band network availability

Modular & Scalable

- A single platform with flexible subscription plans
- Unrivalled, fully-funded technology roadmap
- Evolution to ORCHESTRA - multi-dimensional network of networks from a single operator

Unique Global Coverage

- Seamless, high capacity global coverage: state of the art GEO satellites
- Steerable GX beams for high demand hotspots
- High-speed Polar satellites launching 2024

Unrivalled Safety Services

- 40+ years saving lives at sea
- The only satellite provider offering global service for all GMDSS functions
- Full contingency in each oceanic region
- Fleet Safety, innovative safety solution and direct communications with 60+ IMO approved Rescue Centres

Fully-managed Service

- 24/7/365 service management and support
- Quick install with industry leading self-service portal
- Predictable costs, all on one invoice
- SLAs to back our promises - high MIR/CIR fulfillment

Complete Cyber Security

- Fully cyber secure environment (ISO27001 certified)
- End-to-end device & network security
- 24x7 Dedicated Security Operations Centre
